Disciplined | Determined | Down-to-Earth

IT Support Officer managing 1,500+ endpoints across Microsoft 365, Intune and Entra ID.
A problem solver and pragmatist who thrives on challenges, works well independently and in teams, takes initiative, and delivers results.

Experiences

IT Support Officer
Feb 2024 – Present

St Augustine's College

- Delivered full-scale migration from **Google Workspace** to **Microsoft 365**; transitioned identity, email, and data services with ZERO critical downtime.
- Managed **1,500+ endpoints** across Windows, macOS, and iOS/iPadOS using **Microsoft Intune** and **Jamf**.
- Led **Apple fleet migration (1,000+ devices)** from Jamf to Intune via automated enrolment and configuration profile deployment.
- Created and configured **50+ configuration profiles** and **40+ automation scripts** (**PowerShell/Bash**), improving device provisioning and school device usage compliance.
- Coded a custom **C#** deployment tooling in **Microsoft Visual Studio**, simplifying application packaging and deployment.
- Designed and deployed **Power Platform** solution "L.A.R.A" using **Microsoft Power Apps** and **Microsoft Power Automate** to track loan devices, 2,000+ assets, repairs, and account credentials.
- Dealt with hybrid **Active Directory** and **Entra ID**, managing identity/credential lifecycle, access control, group policy, and license assignment at scale.
- Enforced organisation-wide MFA and password policies aligned to **ISO 27001** and Australian Cyber Security Centre **ISM**.
- Managed full Microsoft 365 security and compliance stack, including **Microsoft Defender**, **Exchange Admin**, **Purview**, **SharePoint Admin**, and **Teams Admin**.
- Dealt with enterprise systems including backup infrastructure via **Veeam**. Including LMS, Print services, security cameras, and access control platforms.
- Supported SOC/NOC operations with endpoint protection, network monitoring, and wireless infrastructure tools including **Cisco Meraki**, **Cambium cnMaestro** and **Xirrus**.
- Delivered infrastructure support across virtualised servers, network installations, and hardware deployment (cabling, switching, endpoints).
- Coordinated with external MSPs and cross-diocese IT teams, dealing with repair turnaround times and ensuring successful project delivery.

Associate Software Developer
Jan 2024
2 Week Work Experience

Advance Computing

- Contributed to the development of a dynamic Microsoft Teams Application Panel, resulting in improved management of support requests, leveraging **PowerApp**, **PowerAutomate**, and **Microsoft SQL**.
- Contributed to '**Refactoring'** a web application with **C#**, **JavaScript**, and **jQuery**.
- Actively participated in daily stand-up sprint meetings, fostering open communication and agile collaboration within the development team of Advance Computing.

Project Lead
Jul 2023 – Oct 2023
3 Month Intern

Twelverays Agency

- Led a cross-functional kanban team in successfully converting automation workflows from Zapier to **Microsoft Power Automate**, consolidating them into the Microsoft automation ecosystem.
- Spearheaded the integration and deployment of **AutoGPT** on **Azure Kubernetes Services**, giving the agency a working foundation for future AI automation initiatives.
- Used a range of applications, including Azure Kubernetes Service (AKS), **Docker containers**, **Postman platform** and **REST API** calls.
- Organised meeting agendas and meeting minutes for weekly meetings with team and client to discuss the progress of the project.

Education

Bachelor of Information Technology (Distinction)
2023

RMIT University

Certificate III of Information, Digital Media & Technology
2019

(ICA30115)

GOTAFE Institute
